**Development of a risk score to guide targeted hepatitis C testing among human immunodeficiency virus patients in Cambodia**

De Weggheleire A *et al.* Risk score for targeted HCV testing

Anja De Weggheleire, Jozefien Buyze, Sokkab An, Sopheak Thai, Johan van Griensven, Sven Francque, Lutgarde Lynen

### **Abstract**

#### **BACKGROUND**

The World Health Organization recommends testing all human immunodeficiency virus (HIV) patients for hepatitis C virus (HCV). In resource-constrained contexts with low-to-intermediate HCV prevalence among HIV patients, as in Cambodia, targeted

Summary

Introduction

Background

Rationale For Augmenting HC...

**Hepatitis C virus (HCV)** is an increasing cause of morbidity and mortality in the United States. Many of the 2.7–3.9 million persons living with **HCV infection** are unaware they are infected and do not receive care (e.g., education, counseling, and medical monitoring) and treatment. CDC estimates that although persons born during 1945–1965 comprise an estimated 27% of the population, they account for approximately three fourths of all **HCV** infections in the United States, 73% of HCV-associated mortality...

Dec 12, 2018 · The role of **hepatitis C virus (HCV)** infection in increasing the **risk** of cardiovascular disease (CVD) is controversial. The objective of the present study is to estimate the 10-year **risk** of CVD in HCV-positive subjects and describe their profile of cardiometabolic **risk** markers compared to HCV-negative subjects. We conducted a cross-sectional study to estimate 10-year CVD **risk**, calculated ...

Mar 12, 2020 · **Hepatitis C virus (HCV)** infection is a major global health problem. WHO guidelines recommend screening all people living with HIV for **hepatitis C**. Considering the limited resources for health in low and middle income countries, **targeted** HCV screening is potentially a more feasible screening strategy for many HIV cohorts. Hence there is an interest in developing clinician-friendly ...

## High prevalence of alcohol use among hepatitis C virus ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2196223>

Feb 28, 2006 · 1. Introduction. Alcohol use is common **among** injection drug users (IDUs), and contributes to adverse drinking consequences such as social, physical and economic problems and risky behaviors such as needle sharing (Anderson et al., 2001; Stein et al., 2000). Heavy alcohol consumption by persons infected with **hepatitis C virus (HCV)** can increase the **risk** of progression of liver fibrosis, to ...
