Retrospective Study

Alpha-1 antitrypsin deficiency and the risk of hepatocellular carcinoma in end-stage liver disease

Clara Antoury, Rocio Lopez, Nizar Zein, James K Stoller, Naim Alkhouri

Abstract

AIM: To evaluate the association between alpha-1 antitrypsin deficiency (A1ATD) and hepatocellular carcinoma (HCC) in patients with end-stage liver disease (ESLD).

Methods: Patients with cirrhosis and ESLD referred to the Cleveland Clinic Foundation
