**Burden of nonalcoholic fatty liver disease and advanced fibrosis in a Texas Hispanic community cohort**

Jen-Jung Pan, Susan P Fisher-Hoch, Chaoru Chen, Ariel E Feldstein, Joseph B McCormick, Mohammad H Rahbar, Laura Beretta, Michael B Fallon

**Abstract**

**AIM:** To investigate the potential burden of nonalcoholic steatohepatitis (NASH) and advanced fibrosis in a Hispanic community.

**METHODS:** Four hundred and forty two participants with available ultrasonography data from the Cameron County Hispanic Cohort were included in this study. Each participant completed a comprehensive questionnaire regarding basic demographic information, medical history, medication use, and social and family history including alcohol use. Values of the nonalcoholic fatty liver disease (NAFLD) fibrosis score (NFS), FIB4 index, BARD score, and Aspartate aminotransferase to Platelet Ratio Index (APRI) were computed using the blood samples collected within 6 months of liver
