Psychiatric and substance use disorders co-morbidities and hepatitis C: Diagnostic and treatment implications

Peter Hauser, Shira Kern

#### Abstract

Chronic hepatitis C viral infection (HCV) is the most common blood-borne viral infection and approximately 2-3% of the world's population or 170-200 million people are infected. In the United States as many as 3-5 million people may have HCV.

Psychiatric and substance use disorders (SUD) are common co-morbid conditions found in people with HCV and are factors in predisposing people to HCV infection. Also,

#### Match Overview

- | Match Number | Source   | Words    | Similarity |
|--------------|--|----------|------------|
| 1            | CrossCheck   | 90 words | 1%         |
|              | Afdhal, Nezam, Stefan Zeuzem, Paul Kwo, Mario Chojkier, Norman Gitlin, Massimo Puoti, Manuel Romero-Gomez, Jean-Pi                 |          |            |
| 2            | CrossCheck   | 84 words | 1%         |
|              | Morasco, B.J. "A randomized trial of paroxetine to prevent interferon- $\alpha$ -induced depression in patients with hepatitis C", |          |            |
