Hepatocellular carcinoma: From clinical practice to evidence-based treatment protocols

Danijel Galun, Dragan Basaric, Marinko Zuvela, Predrag Bulajic, Aleksandar Bogdanovic, Nemanja Bidzic, Miroslav Milicevic

Abstract

Hepatocellular carcinoma (HCC) is one of the major malignant diseases in many healthcare systems. The growing number of new cases diagnosed each year is nearly equal to the number of deaths from this cancer. Worldwide, HCC is a leading cause of cancer-related deaths, as it is the fifth most common cancer and the third most important cause of cancer related death in men. Among various risk factors the two are prevailing: viral hepatitis, namely chronic hepatitis C virus is a well-established risk
