Histopathological differences utilizing the NAFLD Activity score criteria <sup>8</sup> in diabetic (T2DM) and non-diabetic patients with NAFLD

Bharat K Puchakayala, Siddharth Verma, Pushpjeet Kanwar, John Hart, Raghavendra R Sanivarapu, Smruti R Mohanty

**Abstract**

**AIM:** To study clinical and histopathological features of nonalcoholic fatty liver disease (NAFLD) in patients with and without type 2 diabetes mellitus (T2DM) using updated nonalcoholic steatohepatitis clinical research network (NASH-CRN) grading system.

**METHODS:** We retrospectively analyzed data of 235 patients with biopsy proven NAFLD with and without T2DM. This database was utilized in the previously published study comparing ethnicity outcomes in NAFLD by the same corresponding
