Update on hepatitis C: Direct-acting antivirals

Leon L Seifert, Ryan B Perumpail, Aijaz Ahmed

### Abstract

Hepatitis C virus (HCV) was discovered 26 years ago. For decades, **interferon-based therapy** has been **the mainstay of treatment** for HCV. Recently, several **direct-acting antivirals (DAAs)** have been approved **for treatment of** HCV-infected patients and to help combat the virus. These drugs have revolutionized the management of HCV as all-oral regimens with favorable side effect profiles and superior rates of sustained virological response. Emerging real-world data are demonstrating results
