Influence of cirrhosis in cardiac surgery outcomes

Juan C Lopez-Delgado, Francisco Esteve, Casimiro Javierre, Josep L Ventura, Rafael Mañez, Elisabet Farrero, Herminia Torrado, David Rodriguez-Castro, Maria L Carrio

Abstract

Liver cirrhosis has evolved an important risk factor for cardiac surgery due to the higher morbidity and mortality that these patients may suffer compared with general cardiac surgery population. The presence of contributing factors for a poor outcome, such as coagulopathy, a poor nutritional status, an adaptive immune dysfunction, a degree of
