Diagnosis and management of primary sclerosing cholangitis-perspectives from a  
therapeutic endoscopist

Kunjam Modha, Udayakumar Navaneethan

**Abstract**

2  
Primary sclerosing cholangitis (PSC) is a chronic, cholestatic liver condition  
characterized by inflammation, fibrosis, and destruction of the intra- and extrahepatic  
bile ducts. The therapeutic endoscopist plays a key role in the diagnosis and  
management of PSC. In patients presenting with a cholestatic profile, endoscopic  
retrograde cholangiopancreatography (ERCP) is warranted for a definite diagnosis of
