Management of recurrent hepatocellular carcinoma after liver transplant

Kenneth SH Chok

8 Abstract

Hepatocellular carcinoma is the leading cause of deaths in patients with hepatitis B or C, and its incidence has increased considerably over the past decade and is still on the rise. Liver transplantation provides the best chance of cure for patients with hepatocellular carcinoma and liver cirrhosis. With the implementation of the MELD exception system for patients with hepatocellular carcinoma waitlisted for liver transplantation, the number of recipients of liver transplantation is increasing, so is
