Hepatocellular carcinoma beyond Milan criteria: Management and transplant selection criteria

Elshamy M *et al.* HCC Management and transplant selection criteria

Mohammed Elshamy, Federico Aucejo, KV Narayanan Menon, Bijan Egtesad

Abstract

Liver transplantation (LT) for hepatocellular carcinoma (HCC) has been established as a standard treatment in selected patients for the last two and a half decades. After initially dismal outcomes, the Milan criteria (MC) (single HCC ≤ 5 cm or up to 3 HCCs ≤ 3 cm) have been adopted worldwide to select HCC patients for LT, however cumulative experience has shown that MC can be too strict. This has led to the development of
