### Cystic tumors of the pancreas: Opportunities and risks

Marco Del Chiaro, Caroline Verbeke

#### Abstract

Pancreatic Cystic Neoplasms (PCNs) are a high prevalence disease. It is estimated that about 20% of the general population is affected by PCNs. Some of those lesions can progress till cancer, while others behave in a benign fashion. In particular **intraductal papillary mucinous neoplasms of the pancreas can** be considered as the pancreatic analogon to colonic polyps. Treatment of these precursor lesions at an early stage can potentially reduce pancreas cancer mortality and introduce a new
