Role of *Helicobacter pylori* infection in pathogenesis of gastric carcinoma

Rong-Guang Zhang, Guang-Cai Duan, Qing-Tang Fan, Shuai-Yin Chen

Abstract

Gastric cancer is one of the most common carcinoma and the second leading cause of cancer-related deaths worldwide. *Helicobacter pylori* infection causes a series of precancerous lesions like gastritis, atrophy, intestinal metaplasia and dysplasia, and is the strongest known risk factor for gastric cancer, as supported by epidemiological, preclinical and clinical studies. However, the mechanism of *H. pylori* developing gastric carcinoma has not been well defined. Among infected individuals,
