Observational Study
Hepatobiliary manifestations in children with inflammatory bowel disease: A
single-center experience in a low/middle income country

El-Shabrawi MHF *et al.* HB manifestations in paediatric IBD

Mortada HF El-Shabrawi, Sara Tarek, Maha Abou-Zekri, Safa Meshaal, Afaf
Enayet, Engy Adel Mogahed

Abstract
BACKGROUND
There has been a worldwide increase in the reported incidence of inflammatory
bowel disease (IBD) in children over the past 2-3 decades. The hepatobiliary (HB)
manifestations of IBD have been well-studied in children in industrialized and
developed countries but were infrequently reported from low- and middle-
income countries (LMIC) such as Egypt.

AIM
To determine the prevalence of the HB manifestations in a cohort of Egyptian
