**Primary biliary cirrhosis: From bench to bedside**

Elias Kouroumalis, George Notas

**Abstract**

Primary Biliary Cirrhosis (PBC) is a chronic non-suppurative destructive intrahepatic cholangitis leading to cirrhosis after a protracted non cirrhotic stage. The etiology and pathogenesis are largely unknown and autoimmune mechanisms have been implicated to explain the pathological lesions. Many epitopes and autoantigens have been reported as crucial in the pathophysiology of the disease and T and B cells abnormalities have been described, the exact pathways leading to the destruction of small intrahepatic
