Economic evaluations in gastroenterology in Brazil: A systematic review

Luciana Bertocco de Paiva Haddad, Tassia Cristina Decimoni, Jose Antonio Turri, Roseli Leandro, Patrícia Coelho de Soárez

Abstract

AIM: To systematically review economic evaluations in gastroenterology, relating to Brazil, published between 1980 and 2013.

METHODS: We selected full and partial economic evaluations from among those retrieved by searching the following databases: Medline (PubMed); *Excerpta Medica*; the Latin American and Caribbean Health Sciences Literature database; the Scientific Electronic Library Online; the database of the Centre for Reviews and Dissemination; the National Health Service (NHS) Economic Evaluation Database; the NHS Health Technology Assessment database; the Health Economics database of the Brazilian Virtual Library of Health; Scopus; Web of Science; and the Brazilian Network for the Evaluation of Health Technologies. Two researchers, working independently, selected the studies and extracted the data.
