The strategy of using diffusion based MRI imaging sequences to help produce Over the 15 years since MR Neurography was initially brought into clinical use, ... Studies of the lumbosacral plexus, proximal sciatic nerve and other pelvic Imaging of the complete course of the L4 spinal nerve as it progresses into the

Sciatica: Detection and Confirmation by New Method ...

www.ijssurgery.com/10.14444/1015 翻译此页

It is not known if in symptomatic patients with sciatica distal parts of the nerve are painful Focus on nerve root itself is lacking in studies of sciatica and nerve mediated leg pain. This is one sign which may be useful in absence of MRI access. radiologically of L5 or S1 levels do not cause pain beyond over the lumbar
