Radium-223 and metastatic castration-resistant prostate cancer: All that glitters is not gold

 Carlo Aprile,<sup>7</sup> Marco G Persico, Lorenzo Lodola, Federica E Buroni

### Abstract

After being approved by the National Drug Agency in several countries, Radium 223 is gaining wide acceptance in the treatment of bone metastatic castration resistant prostate cancer. The exact mechanism of action remain unclear: the established model of direct alpha-particle irradiation from the remodelling bone surface, where Ra 223 accumulates, surrounding the tumor foci can explain a lethal effect only on metastatic microdeposits,
