Horizontally root fractured teeth with pulpal vitality - two case reports

Luciano Silva, Pamella Alvares, José Alcides Arruda, Leni Verônica Silva, Cleomar Rodrigues, Ana Paula Sobral, Marcia Silveira

Abstract

This case study reports the successful outcome of horizontal root fractures of two different patients, which took place in permanent incisors. Report 1 describes a case of a 29 year old patient who suffered a mandibular trauma affecting mainly the lower central incisors, caused by a car accident. A panoramic radiograph was taken right after the accident and showed a horizontal root fracture in the middle third of tooth 42, which went untreated. Report 2 illustrates a case of a 17 year old male patient who searched for orthodontic therapy and
