Manuscript Type: Original Article

*Basic Study*

**Gd-EOB-DTPA based MRI for predicting liver response to portal vein embolization**

**Janio Szklaruk, Gustavo Luersen, Jingfei Ma, Wei Wei, Michelle Underwood**

**Abstract**

*AIM*

To evaluate the correlation between degree of kinetic growth (kGR) of the liver following portal vein embolization (PVE) liver and the enhancement of the during the hepatobiliary phase of contrast administration and to evaluate if the enhancement can be used to predict response to PVE prior to the procedure.
