**Utility of recognizing early electrocardiogram changes in bronchogenic Takotsubo cardiomyopathy: A case report**

Maria Khan, Husam Watti, Khagendra Dahal, Paari Dominic

### **Abstract**

Background: Takotsubo cardiomyopathy (TCM) is a transient reversible systolic dysfunction, estimated to be the culprit in 1-2% of patients presenting with clinical symptoms of Acute Coronary Syndrome (ACS). TCM was previously thought to be indistinguishable from ACS on the basis of electrocardiogram (EKG) findings; many
