**New guidelines for the diagnosis and management of pulmonary embolism:  
Key changes**

Erythropoulou-Kaltsidou A *et al.* New guidelines on PE

Anastasia Erythropoulou-Kaltsidou, Stelina Alkagiet, Konstantinos Tziomalos

### Abstract

Pulmonary embolism (PE) is an important public health problem. In August 2019, the European Society of Cardiology in collaboration with the European Respiratory Society released new guidelines for the diagnosis and management of PE. We discuss the basic changes between these recent guidelines and the previous guidelines that were published in 2014. Regarding diagnosis, the new guidelines propose the use of an age-adjusted cut-off level of D-dimers instead of a fixed cut-off value. A D-dimer test adapted to clinical possibility should also be considered instead of fixed cut-
