Cardioprotection by remote ischemic conditioning: mechanisms and clinical evidences

Alberto Aimò, Chiara Borrelli, Alberto Giannoni, Luigi Emilio Pastormerlo, Andrea Barison, Gianluca Mirizzi, Michele Emdin, Claudio Passino

# 1 Abstract

In remote ischemic conditioning (RIC), several cycles of ischemia and reperfusion render distant organ and tissues more resistant to the ischemia-reperfusion injury. The intermittent ischemia can be applied before the ischemic insult in the target site (remote ischemic preconditioning), during the ischemic insult (remote ischemic perconditioning) or at the
