**Role of platelet-rich plasma in ischemic heart disease: an update on the latest evidence**

Eleftherios Spartalis, Periklis Tomos, Demetrios Moris, Antonios Athanasiou, Charalampos Markakis, Michael D. Spartalis, Theodore Troupis, Dimitrios Dimitroulis, Despina Perrea

**Abstract**

Myocardial infarction is the most common cause of congestive heart failure. Novel strategies such as directly reprogramming cardiac fibroblasts into cardiomyocytes are an exciting area of investigation for repair of injured myocardial tissue. The ultimate goal is to rebuild functional myocardium by transplanting exogenous stem cells or by activating native stem cells to induce
