**Percutaneous pulmonary valve implantation in a single artery branch: A preliminary experience**

Massimo Chessa, Gianfranco Butera, Luca Giugno, Angelo Micheletti, Diana G Negura, Mario Carminati

### Abstract

To describe preliminary experience of percutaneous pulmonary valve implantation, in a single pulmonary branch position. Two procedures in 2 patients from a single center are described, where implantation of percutaneous valves within a single pulmonary artery branch was technically successful. The procedural indication was pulmonary valve regurgitation and/or residual stenosis. The 2 patients were symptomatic. An Edwards Sapien™ valve (pt#1), and a Medtronic Melody™ valve (pt#2) were implanted. Both pts were discharged with an excellent valve function. In this report it is underlined that this
