Surgical perspectives⁶⁹ in the management of atrial fibrillation

Katerina Kyprianou, Agamemnon Perikleous, Antonio Stavrou, Inetzi A Dimitrakaki, Dimitrios Challoumas, Georgios Dimitrakakis

Abstract

Atrial fibrillation (AF) is the most common cardiac arrhythmia and a huge public health burden associated with significant morbidity and mortality. For decades an increasing number of patients have undergone surgical treatment of AF, mainly during concomitant cardiac surgery. This has sparked a drive for conducting further studies and researching this field. With the cornerstone Cox-Maze III "cut and sew" procedure being technically challenging, the
