Cardiovascular drugs in the treatment of infantile hemangioma

Fernandez-Pineda I *et al.* Cardiovascular drugs for infantile hemangioma

Israel Fernandez-Pineda, Regan Williams, Lucia Ortega-Laureano, Ryan Jones

Abstract

Since the introduction of propranolol in the treatment of complicated infantile hemangiomas (IH) in 2008, other different beta-blockers, including timolol, acetabutolol, nadolol and atenolol, have been successfully used for the same purpose. Various hypotheses including vasoconstriction, inhibition of angiogenesis and the induction of apoptosis in proliferating endothelial cells have been advanced as the
