Name of Journal: *World Journal of Cardiology***ESPS Manuscript NO:** 24630**Manuscript Type:** Case Report**Asymptomatic giant left atrium****Tardu Özkartal, Felix C Tanner, Markus Niemann****Abstract**

A 78 year old asymptomatic woman was referred to our clinic for a second opinion regarding indication for mitral valve surgery. An echocardiogram showed a moderate mitral stenosis with a concomitant severe regurgitation. The most striking feature, however, was a giant left atrium with a parasternal anteroposterior diameter of 79 mm and a left atrial volume index of 364 ml/m². There are various echocardiographic definitions of a giant left atrium, which are mainly based on measurements of the anteroposterior diameter of the left atrium using M-mode in the
