Basic Study

Control of nuclear-cytoplasmic shuttling of Ankrd54 by PKC

Amy L Samuels, Alison Louw, Reza Zareie, Evan Ingley

Abstract

AIM

To identify and characterize the effect of phosphorylation on the subcellular localization of Ankrd54.

METHODS

HEK293T cells were treated with Calyculin A, staurosporin or PMA. Cells were transfected with eGFP-tagged Ankrd54 with or without Lyn tyrosine
