Jun 01, 2018 · Thymoquinone and resveratrol combination showed significant cell inhibition and increase in **caspase-3** indicating **cell apoptosis**. Both drugs raised reactive oxygen species leading to decrease of **glutathione** and **minor effect on lipid peroxidation**, all these results give a new promising combination with enhanced anticancer effect.

Royal jelly (RJ) is a glandular secretion produced by worker honeybees and is a special food for the queen honeybee. It results in a significant prolongation of the lifespan of the queen honeybee compared with the worker honeybees through anti-inflammatory, anti-oxidant and anti-microbial **activities**. Consequently, RJ is used as cosmetic and dietary supplement throughout the world.
