Locoregional treatment of early breast cancer with isolated tumor cells or micrometastases on sentinel lymph node biopsy

Agnès Tallet, Eric Lambaudie, Monique Cohen, Mathieu Minsat, Marie Bannier, Michel Resbeut, Gilles Houvenaeghel

## Abstract

The advent of sentinel lymph-node technique has led to a shift in lymph-node staging, due to the emergence of new entities namely micrometastases (pN1mi) and isolated tumor cells (pN0(i+)). The prognostic significance of this low positivity in axillary lymph nodes is currently debated, as is, therefore its management. This article provides evidence-based medicine data to take into account for

Locoregional treatment of early breast cancer with isolated tumor cells or mi
