Isolated subcutaneous implantation of a borderline ovarian tumor: A case report and review of the literature

Malgorzata Banys-Paluchowski, Borsu Yeganeh, Jutta Luettgess, Achim Maibach, Ruediger Langenberg, Natalia Krawczyk, Peter Paluchowski, Holger Maul, Gerhard Gebauer

Abstract

Laparoscopy-related tumor implantations of gynecological malignancies into the subcutaneous tissue are rarely diagnosed. We report an interesting case of a 46-year-old female who presented with an abdominal subcutaneous metastasis of a borderline ovarian tumor. The patient received a laparoscopic unilateral
