Manuscript type: CASE REPORT

Male papillary breast cancer treated by wide resection and latissimus dorsi flap reconstruction: A case report and review of the literature

Banys-Paluchowski M, Burandt E, Banys J, Geist S, Sauter G, Krawczyk N, Paluchowski P

Abstract

Breast cancer in men represents between 0.5 and 1% of all breast cancers diagnosed each year. We report a case of advanced breast cancer in a 62-year-old male treated at our interdisciplinary Breast Cancer Center. The patient presented with a newly
