## Patents and intellectual property in orthopaedics and arthroplasty

Uzoigwe CE *et al.* Patents and intellectual property in orthopaedics

Chika Edward Uzoigwe, Ahmed Shoaib

### Abstract

The provision of musculoskeletal services comes at a cost. This is, in part, due to the expense of patent-protected orthopaedic implants. However, patents have a finite lifespan. Patents of the most successful implants are now beginning to expire. They will be exposed to competition from generic but equivalent implants. The net effect is potentially a dramatic diminution in cost. One company, Orthimo, has taken advantage of this and begun manufacturing generic implants with identical design specifications to the most high-demand hip prostheses. This will ultimately lower
