**Rupture of the long head of the biceps brachii tendon near the musculotendinous junction in a young patient: A case report**

Liu X *et al.* Long head biceps tenodesis

Xuan Liu, Andrew Hwee Chye Tan

#### Abstract

We report an unusual case of the long head of the biceps brachii tendon rupture near the musculotendinous junction in a young patient. The injury occurred in a young athlete during sports competition. The clinical presentation, surgical treatment, and technique with tenodesis using a unicortical button of the ruptured tendon were presented. The post-surgical recovery was uneventful, and the patient returned to sports in 6 mo. The treatment approach and surgical technique of the long head of biceps brachii rupture was reviewed and discussed. In conclusion, surgical treatment of the long head of the biceps brachii tendon rupture with unicortical button tenodesis resulted in a favorable outcome in a young athlete.

## Symptomatic chronic long head of biceps rupture: Surgical ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3590700>

Rupture of the long head of biceps (LHB) tendon most frequently occurs secondary to degenerative changes within the tendon and is associated with underlying rotator cuff tendinopathy.[1-3] A cadaveric study has shown concentration of degenerative changes within the tendon at the distal bicipital groove, which could explain the predilection for tendon rupture at that site.

## Case Report of a Bifid Distal Biceps Tendon with Traumatic ...

<https://www.thefreelibrary.com/Case+Report+of+a+Bifid+Distal+Biceps+Tendon+with...> ▾

Evaluation of the distal biceps revealed a bifid tendon with separate origins at the biceps brachii at the musculotendinous junction extending distally with a common sheath for the two tendons. The posterior musculotendinous unit (long head) inserting on the proximal ulnar aspect of the radial tuberosity was noted to be intact.

## Rupture of a bifurcated distal biceps tendon: A case ...

In the specimens with a bifurcated distal biceps tendon, the long head of the tendon inserted at the posterosuperior portion of the radial tuberosity, and the average area was  $71.4 \text{ mm}^2 \pm 11.3$  ...

## Spontaneous biceps tendon rupture in a patient with mixed ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4400687>

Dec 31, 2013 · Summary. Tendon rupture is a rare complication that occurs in patients receiving corticosteroid therapy. We report a case of a middle-aged man with mixed connective tissue disease who presented with spontaneous biceps tendon rupture 5 weeks after initiation of high-dose corticosteroid therapy.

## Injury of the distal biceps at the musculotendinous junction

<https://www.sciencedirect.com/science/article/pii/S1058274606002023>

In conclusion, although complete rupture of the tendinous insertion of the distal biceps brachii remains a more common injury, musculotendinous junction injuries do occur. The key to diagnosis of these injuries is the mechanism of injury, as well as the position of the upper extremity at the time of injury.
