<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4631567>

Midline **cleft** of the lower lip and mandible is an extremely rare condition. Since 1819, when the first **case** was reported by Couronne, fewer than 80 cases have been described in the world **literature** so far. The **cleft** has also been described as facial **cleft** no. 30 by Paul Tessier. The condition varies ...
