[Hip Replacement Implant Loosening Symptoms](#)<https://www.verywellhealth.com/hip-replacement-loosening-2548623>

&lt; Life Span of Hip Replacements Why Hip Replacements Loosen Revision Su &gt;

Most hip replacements last an average of 20 to 25 years. Some hip replacements will last longer, while other hip implants can fail much sooner. Occasionally hip replacement implants will fail immediately after surgery, but in other cases, patients may have implanted joints for 30 or more years with no problems. 2 Decades ago, when joint replacement surgery was new, there were different factors that determined how long a h...

Hip Replacement Implant Loosening Symptoms

https://www.verywellhealth.com/hip-replacement-loosening-2548623

RisksClinical significancePrognosisSymptomsSociety at

Hip replacement surgery is among the most common orthopedic procedures. This operation is performed more than 300,000 times in the United States every year. While the procedure has a proven track record for safety and successfully improve quality of life and life expectancy in many patients, it isn't perfect. Loosening of the hip replacement is a normal consequence of **hip implants** and may require revision. However, the revision p...
