Management of <sup>16</sup>negative pressure wound therapy in the treatment of diabetic foot ulcers

Marco Meloni, Valentina Izzo, Erika Vainieri, Laura Giurato, Valeria Ruotolo, Luigi Uccioli

### Abstract

Diabetic foot (DF) is a common <sup>21</sup>complication of diabetes and the first cause of hospital admission in diabetic patients. In the recent years several guidelines have been proposed to reinforce the the management of DF with a notable increase in diabetes knowledge and an overall reduction of amputations. Significant improvement have <sup>20</sup>
