Resection and reconstruction of soft tissue pelvic and extremity sarcomas with major vascular involvement: Current concepts

Niall P McGoldrick, Joseph S Butler, Maire Lavelle, Stephen Sheehan, Sean Dudeney, Gary C O'Toole

6

**Abstract**

Soft tissue sarcoma accounts for approximately 1% of all cancers diagnosed annually in the United States. When these rare malignant mesodermal tumours arise in the pelvis and extremities, they may potentially encase or invade large calibre vascular structures. This presents a major challenge in terms of safe excision while also leaving acceptable surgical margins. In recent
