4 corner fusion using a multidirectional angular stable locking plate

Tahseen Chaudhry, Michelle Spiteri, Dominic Power, Mark Brewster

### Abstract

**Aim:** To review the results of our experience with the Medartis Aptus plating system for four corner arthrodesis of the wrist, which uses a combination of compression screws and variable angle locking screws.

**Methods:** We reviewed the results of 17 procedures in 16 patients that underwent scaphoid excision and four corner fusion using the Medartis Aptus system between May 2010 and June 2014. The primary outcome
