*Prospective study*Epidemiology of isolated hand ²injuries in the United Arab Emirates

Michal Grivna, Hani O Eid, Fikri M Abu-Zidan

Abstract

AIM: We studied ⁴the demography and risk factors of casualties suffering from isolated hand injuries in order to provide suggestions for hand injury prevention and avoidance.

METHODS: All trauma patients with isolated hand injuries who were admitted to Al Ain Hospital for more than 24 hours during a period of 3 years were studied.
