## 10 Abstract

11 Elbow arthroscopy is a technical challenging surgical procedure because of close  
12 proximity of neurovascular structures and the limited articular working space. With  
13 the rising number of elbow arthroscopies being performed nowadays due to an  
14 increasing number of surgeons performing this procedure and a broader range of  
15 indications, a rise in complications is foreseen. With this editorial we hope to create
