Manuscript Type: Systematic Reviews

Ipsilateral femur and tibia fractures in pediatric patients: **1** A systematic review

**Jason B Anari, Alexander L Neuwirth, B David Horn, Keith D Baldwin**

#### Abstract

**AIM:** To better understand how pediatric floating knee injuries are managed after the wide spread use of new orthopaedic technology.

**Methods:** We searched EMBASE, COCHRANE, & Medline computerized literature databases from the earliest date available in the databases to February 2017 using the following search term including variants & plural counterparts: pediatric floating knee. All studies were thoroughly reviewed by multiple
