Insight into orthodontic appliance induced pain: Mechanism, duration and management

Yasemin Kartal, Omur Polat-Ozsoy

Abstract

Most of the orthodontic patients experience pain during treatment and this significantly influences their attitudes and the approach towards treatment. A number of factors that influence pain response include age, gender, personal pain threshold, mood and stress level of the person, cultural differences and types of orthodontic treatment. Pain is a often overlooked subject by orthodontists, **it is nevertheless important to understand the source and mechanism of the pain** that occurs during treatment, as well as the methods for man-
