Palermo, Daniele D'Agostino, Pierluigi Basso

**Abstract**

The ongoing research on pioneering drug candidates for the overactive bladder  
(OAB) aimed to overcome the limitations of currently licensed  
pharmacotherapies, such as antimuscarinic,  $\beta_3$ -adrenergic agents, and botulinum  
neurotoxin, has been reviewed performing a systematic literature review and  
web search. The review covers the exploratory agents alternative to available
