Overview of embryonal rhabdomyosarcoma of the cervix in women over 40-years-old

Malala Razakanaivo, Nam P Nguyen, Juliette Thariat, Vincent Molinie, Anne-Therese Vlastos, Claire Verschraegen, Vincent Vinh-Hung

### Abstract

The literature on cervical embryonal rhabdomyosarcoma is reviewed here to identify management guidelines for middle-aged women diagnosed with this rare type of gynecologic cancer. Specifically, the PubMed, Web of Science and Google Scholar databases, were searched to find published case series on cervical embryonal rhabdomyosarcoma reporting on four or more patients, of whom at least one was >40
