Dec 01, 2012 · **Down's syndrome** is strongly associated with the development of **pulmonary hypertension**, predominantly associated with upper airway obstruction and **CHD**. The **prevalence** of **CHD** in neonates with **Down's syndrome** is around 42–58%, with AVSD and VSD representing the most common defects [9, 69–71]. A number of factors in individuals with **Down's syndrome** may contribute ...
