Google 学术: Do neutrophil extracellular traps contribute to the heightened risk of thrombosis in inflammatory diseases?

Neutrophil extracellular trap (NET) impact on deep vein ... - Fuchs - 被引用次数: 107

... neutrophils to release extracellular DNA traps that ... - Demers - 被引用次数: 103

Extracellular DNA traps promote thrombosis - Fuchs - 被引用次数: 385

Neutrophil Extracellular Trap (NET) Impact on Deep Vein ...

atvb.ahajournals.org/content/32/8/1777.full 翻译此页

作者: TA Fuchs - 2012 - 被引用次数: 107 - 相关文章

2012年5月31日 - DVT is epidemiologically associated with inflammatory diseases, such ... Neutrophil extracellular traps (NETs) in the time line of deep vein thrombosis (DVT): a model. NETs can also contribute to thrombus formation through interaction with ... with the increased risk for venous thrombosis in these patients.

Neutrophil Extracellular Traps: A Walk on the Wild Side of ...

www.researchgate.net/.../269420052_Neutrophil_Extracellular_... 翻译此页

2015年8月5日 - While the potential value of cf-DNA for the prediction of disease outcome and ... The discovery of neutrophil extracellular traps (NETs) provided a novel ... are released, contribute to host defence and participate in inflammatory disorders. ... who are at increased risk of cardiovascular events or autoimmunity.

Cancers predispose neutrophils to release extracellular ...

www.pnas.org/content/109/32/13076.full 翻译此页

作者: M Demers - 2012 - 被引用次数: 101 - 相关文章

2012年8月7日 - The release of neutrophils extracellular traps (NETs) has been
