### Abstract

**AIM:** To investigate grandparent's knowledge and awareness about the oral health of their grandchildren.

**METHODS:** Grandparents accompanying patients aged 4-8 years, who were living with their grandchildren and caring for them for a major part of the day, when both their parents were at work were included in the study. A 20-item questionnaire covering socio-demographic characteristics, dietary and oral hygiene practices was distributed to them. The sample comprised of 200 grandparents (59 males, 141
