Recirculating chemohyperthermia as a treatment for non-muscle invasive bladder cancer: Current and future perspectives

Javier Flores-Carbajal, Alejandro Sousa-Escandón, Daniel Sousa-Gonzalez, Silvia Rodriguez Gomez, Manuel Lopez Saavedra, M Elia Fernandez Martinez

Abstract

About 75% of all bladder cancer diagnosed are non-muscle invasive bladder cancer (NMIBC), recurring over 50% of them after transurethral resection of the bladder tumor. In order to prevent recurrences, adjuvant intravesical chemotherapy with mitomycin C and immunotherapy with bacillus Calmette-
